- Baseline configuration
- Centralized control
- Role-based access control
- Real-time change tracking
- Change management rules
- Notifications on changes
- Informative reports
- Backup & disaster recovery
- Checking configurations for compliance to standards
- Automating repetitive configuration tasks
- Trails on 'who', 'what' and 'when' of configuration changes

## ManageEngine DeviceExpert

If you are a Network Administrator responsible for managing the configurations of network devices, check yourself:

- Do you spend hours on manually configuring your devices?
- Do you laboriously logon to each device separately to retrieve or change configurations?
- Do frequent configuration changes pose threat to your network availability?

If yes, you certainly need DeviceExpert!

Automating these NCCM activities with DeviceExpert could significantly save your time, cost and resources, reduce the risk of errors and thereby network downtime and improve efficiency and productivity. DeviceExpert is a trusted solution to take total control of the entire life cycle of device configuration management. Administrators can leave their NCCM responsibilities to DeviceExpert and concentrate on strategic network administration tasks.
